**AMC**   
**Design and Manufacturing**

## Custom Machine Design

From contract design of new manufacturing equipment to the redesign of an existing piece, AMC has the experience and capacity to tackle your project. Since 1971 AMC has been improving our customer's manufacturing capacity and efficiency with innovative and effective designs.

## OEM Replacement Parts & Reverse Engineering

AMC has over 36 years of experience and expertise in reverse engineering OEM Parts. No matter the size or complexity, AMC will work with your technical staff to improve the part's durability and performance.

## OEM Replacement Parts Inventory Program

AMC has compiled thousands of detailed part drawings over the past 36 years, and we have become a major OEM parts supplier to the printing and plastic industries. AMC can manufacture and maintain your high-volume parts inventory based on your current usage and make them available for next day delivery. This puts less inventory on your shelf and lowers your per-piece pricing.

## Equipment Overhauls

With a dedicated machine overhaul facility, AMC can overhaul your manufacturing machinery to like-new condition. AMC will replace the worn parts and install new bearings, seals, lube lines, etc. AMC can also upgrade old designs to incorporate any new technology that will improve productivity, flexibility and performance.

## Machine Services

### • TURNING, MILLING, GRINDING, BORING

AMC is also a full service machine facility, specializing in large, complex parts with precise tolerances. AMC works with all types of materials including CAST IRON, ALUMINUM, PLASTICS, FOAM, CARBIDE and all types of STEEL. Whatever your machining requirements, AMC has the answers and the experience.
